SUMMARY

Full Stack Developer with hands-on experience building responsive and secure web applications using **React.js, Spring Boot, Node.js, and MySQL**. Passionate about writing clean, efficient code and delivering end-to-end solutions. Proven problem-solving skills with a **600+ day LeetCode streak** and **1000+ problems solved**. Eager to contribute to innovative projects and grow in a dynamic development environment.

WORK EXPERIENCE

Software Developer Intern Aug 2025 – Present
Fleet Studio

- Built Node.js auth system with custom rate limiting; **strengthened API security & prevented abuse**
- Fixed N+1 queries in PocketBase to **improve efficiency**
- Migrated Linode from Ubuntu to Alpine, **saving \$5/month** in infrastructure costs

Java Full Stack Developer Intern Dec 2024 – Feb 2025
Infosys Springboard

- Built full-stack applications with Java Spring Boot, Thymeleaf, and MySQL
- Followed Agile Scrum methodology, contributing to **4 sprints** and daily stand-ups
- Implemented Spring validation for secure and reliable data handling

Java Full Stack Developer Intern Nov 2024 – Dec 2024
Null Class

- Built frontend with React.js and backend with Spring Boot; developed REST APIs
- Integrated SQL database and implemented Spring validation for data integrity

PROJECTS

Scalable LinkedIn Profile Extraction System Python · Tor · Headless Browser

- **Problem:** Third-party LinkedIn APIs cost \$3–5 per 1000 requests; needed a cost-effective solution for bulk profile lookups
- **Solution:** Built a scalable scraper using partial inputs (name, company, initials) to extract profile URLs
- **Implementation:** Used **multiple Tor instances with round-robin IP rotation** to bypass rate limits and avoid detection
- **Result:** Eliminated API dependency, **saving ~\$3–5 per 1000 requests**; supports high concurrency with low-resource headless browser

Employee Suggestion Application Spring Boot · React Vite · MySQL · Redis · JWT

- **Problem:** Needed a secure platform for employees to submit suggestions with role-based access control
- **Solution:** Built full-stack app with **JWT authentication** and admin/employee role separation
- **Optimization:** Implemented **Redis caching** to reduce DB load and **Leaky Bucket rate limiting** to prevent API abuse

URL Shortener Spring Boot · React · JWT · MySQL · Docker

- **Problem:** Long URLs are difficult to share; needed secure, trackable short links with expiration
- **Solution:** Built URL shortener with **JWT auth**, custom aliases, click tracking, and auto-expiration
- **Deployment:** Containerized with **Docker** for consistent deployment across environments

Care and Cure Hospital Management System Spring Boot · Thymeleaf · MySQL

- **Problem:** Manual hospital records caused delays and security concerns with patient data
- **Solution:** Built role-based system (Admin/Doctor/Patient) with secure login and dashboard views
- **Optimization:** **Optimized MySQL queries** reducing response time; added input validation for data integrity
