Energetic and innovative **Full Stack Developer** with **2 years** of hands-on experience, adept at weaving digital dreams into reality. My expertise spans the realms of front-end magic, back-end wizardry and the art of databases. With a sprinkle of AWS curiosity, I'm on a mission to create transformative web experiences that captivate and inspire. Ready to embark on new challenges that demand both creativity and technical finesse.

SKILLS

Javascript, Python, React JS, React Redux, Vite JS, Next JS, Remix JS, Tailwind CSS, Component Libraries(shad CN, radix UI, MUI), Cypress Test, Accessibility(A11y), WCAG, Hapi JS, Tornado, Docker, Shopify, Postgress SQL, MySQL, AWS Lambda, AWS S3, AWS Amplify, Git Version Control, Agile,Jira.

WORK EXPERIENCE

Fleet Studio Technologies, Chennai, TN

Sep 2021 – Present

Software Development Engineer-I

- Proudly took charge of the **entire product's front end**, crafting exhilarating features solo and maintaining a seamless collaboration with the backend team.Commanding the product's entire front end has been a career highlight, a testament to my dedication to crafting seamless and impactful user interfaces.
- Forged strategic partnerships with both the data and marketing teams, seamlessly integrating **Posthog** to enhance analytics and unlock valuable insights, while also integrating **Hubspot** to optimize workflows and gain firsthand experience with this powerful marketing tool.
- Engineered a seamless user onboarding journey by crafting a front-end interface integrated with powerful **back-end APIs**. Additionally, wrote some mission-critical APIs for the user onboarding, ensuring intelligent data mapping, dynamic user plan checks, and a frictionless experience.
- A one-person tech orchestra: From boilerplate inception to the grand finale of a seamless, polished interface, masterminded the **Admin Dashboard** front-end with responsiveness, adapting flawlessly to various devices and screen sizes for a flagship product, a solo tech choreographer delivering a seamless symphony of pixels.
- Implemented seamless **Slack notifications** triggered upon new user sign-up's in the product, ensuring real-time updates and fostering quick and efficient communication within the team.
- Collaborated on the development of an internal **employee portal**, seamlessly juggling responsibilities in both front-end and back-end. Implemented efficient cron jobs to enhance system automation and streamline processes.
- Tackled **Google email development**, navigating constraints imposed by Google.Wrestled with Google's restrictions, turning challenges into tech triumphs.
- Independently crafted a **Google extension** for the product, hosted on **Google Web Store** and gained insights into Google's policies. Pleased to be the sole contributor, handling both development and deployment.
- Engaged in enhancing the product's **marketing site** and refining the user interface for **product's public reports**, striking a balance between aesthetics and functionality for an impactful user experience.

Project Trainee

- Engineered a robust cloud infrastructure by deploying **Python**-based serverless functions on **AWS Lambda**, ensuring scalability. Orchestrated a high-performance **API Gateway** to connect these functions within our microservices ecosystem, optimizing communication for efficiency.
- Dived into **Accessibility(A11y)** and **Web Content Accessibility Guidelines (WCAG)** and devised a scalable, automated solution for addressing website accessibility issues.

Education

Sri Eshwar College of Engineering, Coimbatore, IN

Bachelor of Engineering (Electronics and Communication Engineering)

2018-2022

CGPA– 8.1
